- Forwarding rate: 95Mbps.

KEY FEATURES AND HIGHLIGHTS

PERFORMANCE AND SCALABILITY:-

With high switching capacity, AP-SG6500E-24X-4XG support wire-speed L2/L3 forwarding and high routing performance for IPv4 and IPv6 protocols.

The 10 Gigabit Ethernet connectivity of AP-SG6500E-24X-4XG is accomplished via a hot-pluggable 10 Gigabit SFP+ transceiver which supports distance up to 300 meters over multimode fiber and 10 to 40km over single-mode fiber (The distance depends the optical module chosen).

VSF (VIRTUAL SWITCH FRAMEWORK):-

Virtual Switch Framework can virtualize multiple AirPro switches into one logical device, achieving the sharing of information and data tables between different switches. The performance and ports density of virtualized device are greatly enlarged by times under VSF. VSF also simplifies management work for network administrator and provides more reliability.

RICH L3 FEATURES:-

AP-SG6500E-24X-4XG delivers high-performance, hardware based IP routing. RIP, OSPF and BGP provide dynamic routing by exchanging routing information with other Layer 3 switches and routers. With AP-SG6500E-24X-4XG, customers could easily achieve Policy based Route (PBR), which is important when they need multi exit application.

STRONG MULTICAST:-

AP-SG6500E-24X-4XG supports abundant multicast features. In Layer

2, such as IGMPv1/v2/v3 snooping and fast leave. L3 multicast protocols such as IGMPv1/v2/v3. With Multicast VLAN Register (MVR), multicast receiver/sender control and illegal multicast source detect functions; AP-SG6500E-24X-4XG series provides great application experience for customer.

EASY HIGH RELIABILITY NETWORK:-

MRPP is Multi-layer Ring Protection Protocol, which is AirPro's private fast Ethernet ring protocol. Comparing to spanning tree protocol, it has advantages of fast convergence, simple protocol calculation, less system resources cost and so on, which can improve the reliability of Ethernet network operation. Comprehensive QoS With 8 queues per port, AP-SG6500E-24X-4XG series enable differentiated management of up to 8 traffic types. The traffic is prioritized according to IEEE802.1p, DSCP, IP precedence and TCP/UDP port number, giving optimal performance to real-time applications such as voice and video. AP-SG6500E-24X-4XG series also supports Bi-directional rate-limiting, per port or traffic class, preserves network bandwidth and allows full control of network resources.

ABUNDANT IPV6 SUPPORT:-

AP-SG6500E-24X-4XG series supports IPv6 switching and routing based on hardware for maximum performance. With increased network devices growing the need for larger addressing and higher security become critical, AP-SG6500E-24X-4XG will be a right product to meet this requirement.
